

## **Technical Writer/Author**

**Remote, Frankfurt DE, Warwick UK**

**€ 35-50T plus significant bonus**

### **About Apteco**

Apteco produces world-class marketing analytics and automation solutions. Using Apteco Software is a powerful way for analysts and marketers to work together on insights, visualisation, modelling, automation and reporting. We produce great technologies that allow our clients to understand and communicate with their customer base in intelligent ways.

### **The location**

We are looking for somebody who can join us in our modern Frankfurt office with a beautiful skyline view over the river Main, or in Warwick, at our high-spec Warwick town centre office with views out over the historic rooftops and 1,000-year-old castle. We're also currently renovating a second office building in Warwick town centre, doubling our space for safe, socially distanced collaboration. Remote working is also fully supported, and some staff are based at home rather than the office.

### **The role**

We're looking for a qualified Technical Writer/Author with good experience to join our content team at Apteco. You'll need to have an aptitude for communicating complex technology topics clearly and concisely to our customers and partners around the world. To help with this, you can talk directly to the SME's who conceived, designed, and implemented everything that you'll be working on.

### **The benefits**

We offer great remuneration and success commission. If you make an exceptional contribution, we'll reward you with a truly exceptional bonus.

### **Required Qualifications:**

- Fluent level English and German language
- Technical Communication qualification
- Strong Technical Writing skills, with the ability to:
  - Precisely follow a structured style guide
  - Work collaboratively using content creation and source control tools
- Good experience with, and enthusiasm for using MadCap Flare
- Good knowledge of XHTML, CSS, JavaScript

### **Preferred Qualifications:**

- Technical expertise, especially relating to SQL and PowerShell scripting
- Experience documenting APIs, installations, and integrations

### **How can you apply?**

Send us your CV and a covering email/letter to tell us why you would be great for this role at Apteco. Also, provide examples/send us links to anything great you have worked on. Send your application to us at [jobs@apteco.com](mailto:jobs@apteco.com). We look forward to seeing it.

### **What else should I know?**

We offer great benefits:

- A motivated team in a great workplace
- Start-up atmosphere and excellent career prospects
- A performance-related remuneration plus success commission
- Diverse and challenging tasks in an international team
- Supplementary pension benefits
- Training and further education
- Regular team events

### **We have a log cabin**

We own a log cabin in the Snowdonia National Park. It sleeps 10 and we use it primarily for staff family breaks but also for offsite team meetings. We rent it to members of staff who take their kids or parents or friends to enjoy the great outdoors.

### **You get fully flexible working**

We don't watch the clock, we just ask you to take responsibility for getting your work done and averaging your hours over the long term.

### **You get great kit**

You choose your kit and we buy the best that we can. You get a laptop to suit you with the monitors and other accessories to help you get your work done well and without impacting your health.

### **An annual Christmas weekend break**

We take you and your whole family away for a long weekend break sometime around Christmas. That includes your partner and kids and we pay for it all – flights, accommodation, meals, events, etc.

### **Secondments to our overseas offices**

If you can contribute to growing our overseas businesses, you can apply for a secondment to work there for a period.
